Stiffen basket. Run ribbon through handle and make bow at one side. Insert water tumbler.

STIFFENING BASKET . . . Have ready straight pins, a large square of cardboard with a tall heavy glass turned upside down in the center of it. Then, in a pot large enough to hold crocheted pieces, mix $\frac{1}{2}$ cup of water with 1 cup of sugar. Boil for 2 minutes. Put pieces into mixture and boil for 2 more minutes, stirring continually to insure even distribution of syrup through pieces. Remove pieces. Pull basket over glass and pin points to cardboard. Let stand until almost dry but still flexible enough to mold into shape. Shape basket as in illustration or as desired. Allow to dry thoroughly. Handle is stretched flat and dried. If desired, run a wire through handle before sewing to basket. Run ribbon through handle and sew rosette in place.

Tips for Crocheters

IMPORTANT . . . Be sure to buy at one time sufficient material of the same dye lot to complete the article you wish to make, as it is impossible to avoid slight variations in color in different dye lots.

GAUGE . . . Before starting your article, make a small sample of the stitch. If your working tension is too tight or too loose, use a finer or coarser needle, to obtain the correct gauge.

BLOCKING DIRECTIONS . . . Following measurements given, with rust-proof pins pin article right side down on a well padded flat surface. If article is too large for pressing table, block in sections of convenient size. Be sure to pin out all picots, loops, scallops, etc., along outside edges. Press through a damp cloth with a moderately hot iron (do not rest iron on decorative raised stitches). When thoroughly dry, remove pins.

STARCHING . . . Starch the article, pin out on a padded surface following original measurements and outline. Press through a dry cloth and remove pins when article is dry. The stiffness of the starched article is governed by individual taste. Following directions

on packaged starch and experimenting will bring desired results.

TO LAUNDER COTTON ARTICLES

. . . Before laundering, record all important measurements. Launder article in warm water, using a good neutral soap or soap flakes. Do not use bleaching solutions! Allow to dry thoroughly on a flat surface. Then block article, following **Blocking Directions**.
